CANADIAN SOCIETY
OF ENDOCRINOLOGY
AND METABOLISM

MISSION

CSEM IS THE NATIONAL ADVOCATE FOR EXCELLENCE IN ENDOCRINOLOGY RESEARCH, EDUCATION, AND PATIENT CARE.

As the national specialty society representing Canadian endocrinologists, we advance the discipline of endocrinology and metabolism in Canada. We connect academic and community-based endocrinologists and researchers engaged in providing health care, education, and research within the broad domain of endocrinology. As an accredited continuing professional development provider of the Royal College of Physicians and Surgeons of Canada, we develop and approve high-quality, accredited education for specialists.

PRESIDENT'S MESSAGE

As the effects of the global pandemic continue to impact our endocrinology community and all of us as physicians, I am proud that CSEM has achieved new growth and significant accomplishments over the past year.

As a National Specialty Society and an accredited provider of the Royal College of Physicians and Surgeons of Canada, CSEM was required to renew its status via an intensive accreditation review. Thanks to the leadership and tremendous efforts of Dr. Céline Huot, CPD Chair (2018–2021) and Dr. Elizabeth Rosolowsky, CPD Chair (2021–present), CSEM achieved the full 8-year accreditation renewal. This endorsement from the Royal College demonstrates CSEM's commitment to high-quality educational design and ethical continuing professional development activities.

During the last few years we have seen increasing drug shortages. CSEM will continue to advocate for greater access to drugs as well as increased transparency regarding (looming) drug shortages.

CSEM added a second full-time employee in January 2022. We welcome Jennifer Lafreniere as a permanent Membership and Administrative Coordinator. Her skills will help us refine and expand our services to you, our members. We also thank Pam Gosewich, temporary part-time Membership Coordinator for assisting CSEM during our recent growth phase.

Our successes can be attributed to the dedication of our Council and Committee volunteers, strong staff management, and the continued support of our members. It is only through a strong and engaged member base that we can effectively advocate for excellence in endocrinology research, education, and patient care. As President, I thank you for all you do to advance the discipline of endocrinology and metabolism in Canada.

STAN VAN UUM, MD, PHD, FRCPC
